

Document Verification Update

Date: 26 Sep 2026

Environment: Production, <http://122.180.247.166:3001> (deployed 24 Sep 2026)

Scope: points from the 22 Sep review and Phase 1 rows of the Doc Verification sheet

How the proofs were made

Rules only show on a claim that breaks them, so test claims were created on production in sub-category ISL - DVS - Test V1. Each has one small PDF made to trigger one rule, marked TEST DOCUMENT on every page. The customer names were loaded through the normal observation sheet import.

Claim ID	Proves
TEST-DMS-01	DMS name vs Invoice
TEST-RC-01	Invoice vs RC: Diff Name
TEST-RC-02	Invoice vs RC: Same Name
TEST-KYC-01	KYC name mismatch is a red flag
TEST-NOM-01	Nominee name missing
TEST-DUP-01, TEST-DUP-02	Duplicate address, PRAN, ESI, Pension No
TEST-DL-01	DL format, impossible date, red flag counts

The test PDFs were generated by software, so they also get the red flag Document produced/edited by ReportLab. That is correct behaviour and can be ignored for these claims.

To check any point yourself: open Claim Dashboard, search the claim ID, open the claim. The card is on the claim page. Click the file name inside the card to open the document with the findings on the right. Click a finding to zoom to it.

1. Claim page

Claim ID: MZBB1811LSN014084 (real claim)

Spell

4 doubtful (possible scan misread): mothro→motors, enquire→require, uttarkhand→uttarakhand, yealber→dealer
 [MZBB1811LSN014084.pdf](#) — 4 findings:

- Doubtful "enquire" (expected "require") — the scan quality can account for this, please confirm visually
- Doubtful "yealber" (expected "dealer") — the scan quality can account for this, please confirm visually
- Doubtful "mothro" (expected "motors") — the scan quality can account for this, please confirm visually
- Doubtful "uttarkhand" (expected "uttarakhand") — the scan quality can account for this, please confirm visually

QR

2 QR code(s) found across 1 document(s).
 [MZBB1811LSN014084.pdf](#) — 4 findings:

- QR code read from MZBB1811LSN014084.pdf page 4.
- No QR code was found on page 3 of MZBB1811LSN014084.pdf, which reads as a PAN card. Many older card designs carry no QR code at all; if this one does, the scan may be too small or blurred to read it.
- No QR code was found on page 5 of MZBB1811LSN014084.pdf, which reads as an Aadhaar card. Many older card designs carry no QR code at all; if this one does, the scan may be too small or blurred to read it.
- QR code read from MZBB1811LSN014084.pdf page 7.

Intra-Claim

Claim ID found in 1 of 1 document(s).
 [MZBB1811LSN014084.pdf](#)

Red Flags

2 red flag(s) found: Signatory misspelt x1, Editor watermark x1; 1 advisory.
 [MZBB1811LSN014084.pdf](#) — 4 findings:

- Editable doc - Text insertable in "MZBB1811LSN014084.pdf" (pages 1, 2, 6, 7, 8)
- Document produced/edited by "iLovePDF; modified using iText® 5.5.9 ©2000-2015 iText Group NV (AGPL-version)"
- PAN "GROPS2837G" format is valid; 4th letter 'P' = Individual
- Signature block reads "Auth. Sing" — "Sing" is not "sign"

Missing Docs

All 2 required document types present.
 [PAN Card \(MZBB1811LSN014084.pdf p.3\)](#), [Aadhar Card \(MZBB1811LSN014084.pdf p.5\)](#)

Data Compare

All compared values agree across documents.
 [MZBB1811LSN014084.pdf](#)

- All check cards are expanded by default. A card can still be collapsed from its header.
- New Data Compare check with its own card and status badge.
- Claim Rules panel removed from the claim page, as most of its rows repeated the check badges.

Why: in the 22 Sep review the cards had to be opened one by one, and the Data Compare results were inside Missing Docs where they were hard to find.

2. Findings panel: red flags first, value boxed

TEST DOCUMENT - software verification sample

SALARY SLIP - SEPTEMBER 2026

Employee Name : VIKAS SINGH

Employee Code : EMPVIK01

PRAN : 110012345678

ESIC No : 3112345678

PPO No : 123456789012

Basic Pay : 25000

Net Pay : 31000

Address : 12 GANDHI NAGAR ROAD, JAIPUR 302001

Findings

FINDINGS 4 1/4

PAGE 1 4

- 1 PRAN "110012345678" also appears on claim TEST-DUP-01.
- 2 Address "12 GANDHI NAGAR ROAD, JAIPUR 302001" also appears on claim TEST-DUP-01.
- 3 Pension number "123456789012" also appears on claim TEST-DUP-01.
- 4 ESI number "3112345678" also appears on claim TEST-DUP-01.

- Red flags are listed first, then advisories, grouped by page. The document opens on the first red flag.
- Each finding is numbered and the value is boxed on the document with the same number. Clicking a finding zooms to it.

Steps: open TEST-DUP-02, click TEST-DUP-02.pdf in the Duplicate card.

- New Data Compare column and filter. The column is also in the Excel export.
- Claims validated before 24 Sep show PENDING until they are re-validated (select claims, click Validate).

4. Data Compare: DMS Upload File vs Invoice

Sheet row: High, 1, DMS Upload File, Customer Name, Invoice, Customer name, If different with both documents - Red Flag, 1st Chk to apply.

Claim ID: TEST-DMS-01. DMS customer name SURESH KUMAR (from the imported sheet), invoice says RAHUL VERMA.

Data Compare

1 mismatch(es) between documents.

TEST-DMS-01.pdf — 1 finding:

- Customer name "RAHUL VERMA" on the invoice does not match "SURESH KUMAR" in the DMS upload.

TEST-DMS-01 All Spell QR Intra-Claim 1 Missing Docs Data Compare 1 Red Flags 2 Duplicate

TEST DOCUMENT - software verification sample

TAX INVOICE

Dealer : ABC MOTORS PVT LTD

Invoice No : INV-2026-0001

Invoice Date : 10/09/2026

Customer Name : RAHUL VERMA

Chassis No : MZBTEST0001

Engine No : ENGTEST001

Invoice Value : 850000

Findings

FINDINGS 1 1/1

PAGE 1 - 1

1 Customer name "RAHUL VERMA" on the invoice does not match "SURESH KUMAR" in the DMS upload.

How it works: the Customer Name column of the observation sheet import is taken as the DMS value and compared with the customer name on the invoice (Customer Name or Bill To). Titles like Mr/Mrs and word order are ignored. A mismatch is a red flag and is listed first on the card.

Steps: open TEST-DMS-01, see the Data Compare card, click TEST-DMS-01.pdf to see the box on the invoice name.

5. Data Compare: Invoice vs Old car RC, Same Name / Diff Name

Sheet row: High, 1, Invoice, Customer name, Old car RC, Customer name, If details are different with both documents - Red Flag, Same Name / Diff Name.

Claim ID: TEST-RC-01 (invoice RAJESH KUMAR, RC owner MOHAN LAL)

Data Compare

1 mismatch(es) between documents. Invoice vs RC customer name: Diff Name ("RAJESH KUMAR" vs "MOHAN LAL").

[TEST-RC-01.pdf](#) — 1 finding:

- Invoice vs RC customer name: Diff Name ("RAJESH KUMAR" vs "MOHAN LAL").

TEST DOCUMENT - software verification sample

CERTIFICATE OF REGISTRATION

Registering Authority : RTO JAIPUR

Regn No : RJ14 AB 1234

Owner Name : MOHAN LAL

Chassis No : MZBTEST0001

Engine No : ENGTEST001

Findings

FINDINGS 1 1/1

PAGE 2 - 1

1 Invoice vs RC customer name: Diff Name ("RAJESH KUMAR" vs "MOHAN LAL").

Claim ID: TEST-RC-02 (same name on both)

Data Compare

All compared values agree across documents. Invoice vs RC customer name: Same Name ("RAJESH KUMAR").

TEST-RC-02.pdf — 1 finding:

- Invoice vs RC customer name: Same Name ("RAJESH KUMAR").

How it works: when a claim has both an invoice and an RC, the card states the result as Same Name or Diff Name. Diff Name is a red flag and is reported once. Same Name is shown as a note and the check passes.

6. Data Compare: KYC name mismatch is a red flag

Sheet row: High, 1, Invoice, Customer Name, Every Doc and KYC, Name, If different with both documents - Red Flag.

Claim ID: TEST-KYC-01 (invoice RAJESH KUMAR, KYC name SURESH SHARMA)

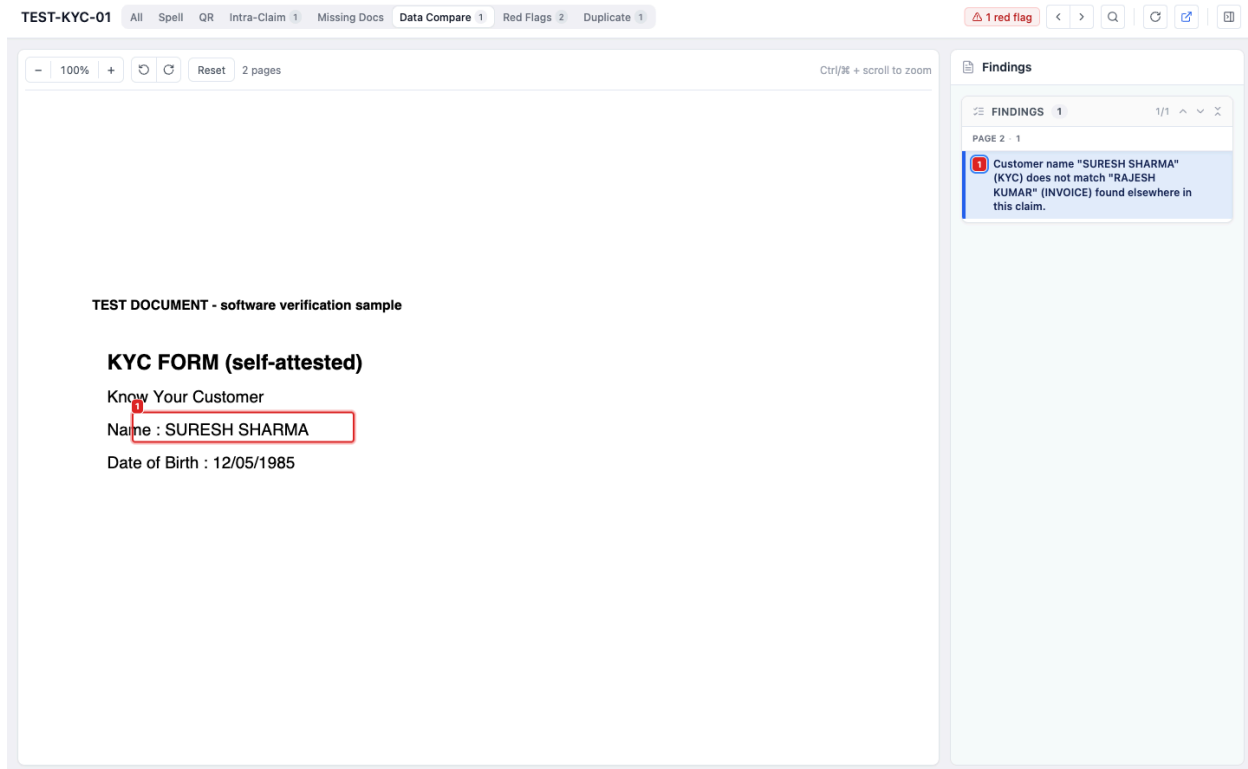

Data Compare

1 mismatch(es) between documents.

TEST-KYC-01.pdf — 1 finding:

- Customer name "SURESH SHARMA" (KYC) does not match "RAJESH KUMAR" (INVOICE) found elsewhere in this claim.

Document Verification Update

How it works: this was an advisory earlier, because a KYC document is sometimes of a family member. As per the sheet it is now a red flag. Father, mother and spouse names are compared separately and do not raise this.

7. Data Pattern: nominee name missing

Sheet row: Normal, 1, Insurance, Nominee name is missing but other nominee details are present (name prefix to be ignored), Show result - No name in Nominee but other details available.

Claim ID: TEST-NOM-01 (nominee row reads Mrs. 42 SPOUSE NA NA)

Red Flags

2 red flag(s) found: Nominee without name x1, Editor watermark x1; 1 advisory.

[TEST-NOM-01.pdf](#) — 3 findings:

- No name in Nominee but other details available
- No signature / authorised-signatory wording found in the document
- Document produced/edited by "ReportLab PDF Library - (opensource)"

TEST-NOM-01 All Spell QR Intra-Claim 1 Missing Docs Data Compare Red Flags 3 Duplicate 1 2 red flags 1 advisory

TEST DOCUMENT - software verification sample

CERTIFICATE OF INSURANCE CUM POLICY SCHEDULE

Policy No : 9900112233

Insured Name : RAJESH KUMAR

Premium : 15608

Sum Insured : 902405

Nominee Details

Name of Nominee	Age	Relationship with Insured	Name of Appointee	Relationship with Nominee
Mrs.	42	SPOUSE	NA	NA

Findings

FINDINGS 3

RED FLAG - PAGE 1 - 1

— No name in Nominee but other details available

RED FLAG - DOCUMENT - 1

— Document produced/edited by "ReportLab PDF Library - (opensource)"

ADVISORY - DOCUMENT - 1

— No signature / authorised-signatory wording found in the document

How it works: the row under the nominee header is read. If there is no name left after removing the prefix (Mr, Mrs, Ms, Smt, Shri) and NA, but age or relationship is filled, it is a red flag with the text from the sheet.

8. Data Pattern: DL number, impossible date, count per rule

Sheet rows: High, 1, DL, DL no. should be 16 digits, If not - Red Flag and its Count.
High, 1, Every Doc, date, if any date is not as per calendar. Red Flag and its Count.

Claim ID: TEST-DL-01 (DL No MH142011006, Issue Date 31/04/2020)

Red Flags

3 red flag(s) found: DL format x1, Impossible date x1, Editor watermark x1;
1 advisory.

[TEST-DL-01.pdf](#) — 4 findings:

- DL number "MH142011006" is not 2 letters + 13 digits (printed as 16 with the space, e.g. "MH14 20110062821")
- No signature / authorised-signatory wording found in the document
- Document produced/edited by "ReportLab PDF Library - (opensource)"
- Impossible date "31/04/2020" (31 > 30 for month 4)

TEST-DL-01 All Spell 1 QR Intra-Claim 1 Missing Docs Data Compare Red Flags 4 Duplicate

3 red flags 1 advisory

100% Reset 1 page Ctrl/⌘ + scroll to zoom

TEST DOCUMENT - software verification sample

UNION OF INDIA

Driving Licence No: **MH142011006**

COV : LMV

Name : RAJESH KUMAR

Issue Date : 31/04/2020

Findings

FINDINGS 4 1/1

RED FLAG - PAGE 1 - 1

1 DL number "MH142011006" is not 2 letters + 13 digits (printed as 16 with the space, e.g. "MH14 20110062821")

RED FLAG - DOCUMENT - 2

— Document produced/edited by "ReportLab PDF Library - (opensource)"

— Impossible date "31/04/2020" (31 > 30 for month 4)

ADVISORY - DOCUMENT - 1

— No signature / authorised-signatory wording found in the document

How it works: the DL number must be 2 letters and 13 digits, which is 16 characters when printed with the space (MH14 20110062821). 31 April is not a valid date. The card summary shows the count per rule: DL format x1, Impossible date x1.

9. Data Pattern: editable PDF

Sheet row: Normal, 1, All Pdf docs, If any text is editable in any pdf file, Editable doc - Text insertable in Doc Name.

Claim ID: MZBB1811LSN014084 (real claim), see screenshot in point 1, Red Flags card: Editable doc - Text insertable in MZBB1811LSN014084.pdf (pages 1, 2, 6, 7, 8).

How it works: in a PDF that is otherwise scanned, pages that carry real typed text (not scanned image) are listed. It is an advisory, because genuine digital insurance policies are often merged into the scan.

10. Duplicacy: address, PRAN, ESI, Pension No

Sheet rows: High, 1, Every Doc, Address, If Address is same in 2 different Case Ids - Red flag. High, 1, Salary Slip, Pran No, ESI No, Pension No.

Claim IDs: TEST-DUP-01 and TEST-DUP-02 (same address, PRAN, ESI and PPO number on both salary slips)

Duplicate

4 duplicate data point(s) shared with other claims, 4 of them a red flag.

[TEST-DUP-02.pdf](#) — 4 findings:

- PRAN "110012345678" also appears on claim TEST-DUP-01.
- Address "12 GANDHI NAGAR ROAD, JAIPUR 302001" also appears on claim TEST-DUP-01.
- Pension number "123456789012" also appears on claim TEST-DUP-01.
- ESI number "3112345678" also appears on claim TEST-DUP-01.

Document with all four values boxed: see point 2.

How it works: these values are stored for every validated claim and matched against other claims in the same sub-category. A shared address was an advisory earlier and is now a red flag as per the sheet. PRAN, ESI and Pension No are new.

11. Other fixes

- One page is counted as one document type. An invoice page with the text Bill To is no longer also counted as a Bill in Missing Docs.
- Designated Person Name (broker staff) on insurance policies is no longer read as the customer name.
- Customer name after Bill To on Kia invoices is now read, so the invoice is included in the name checks.
- Info notes (for example QR code read) are no longer listed as advisories.
